SUPER-MATE

Universal Siliconised Acrylic Sealant

A truly universal sealant - one tube does all. Super-Mate performs better than cheaper alternatives because it is a siliconised acrylic and so can be used outside and in. It also performs well in a sanitary / bathroom environment as it contains a powerful fungicide and is more flexible than most other acrylics, providing a permanently flexible, long lasting seal.

- **Permanently Flexible • Excellent Adhesion •**
- **Mould Resistant • Easy Cleanup •**
- **Can be Painted • Internal and External Use •**
- **CE Approved • Conforms to EN15651-1, F EXT-INT •**

Super-Mate is ideal for internal or external sealing of timber, metal and PVCu window and door frames, filling gaps and cracks in general decorating applications such as brickwork, stone, plaster and concrete. It is also perfect for use as an adhesive for bonding polystyrene coving and tiles, cork tiles and wood block flooring.
